RFP Addendum: Questions and Answers

Couse Creek RM 7 Restoration Design

Date: October 3, 2024

ADDITIONAL PROJECT INFORMATION:

- Within the project reach, the dirt access road crosses Couse Creek at two locations. Treatment options for these crossings should be considered in the restoration design.

QUESTIONS AND ANSWERS

Below are clarification questions and answers associated with the RFP.

1. **Question:** Will there be any baseline survey data available to support the design and/or permitting phases of this project?

Answer: No baseline survey data are available.

2. **Question:** The RFP mentions the need for permitting support. Have any specific permitting requirements been identified by partner agencies (e.g., BPA), or should we expect the permitting process to follow typical protocols for projects of this nature in this region?

Answer: Partner agencies have not identified specific permitting requirements, but WWBWC requests that bids include costs for the following components of permitting support:

- Joint Permit Application, including Stream Function Assessment Methodology (SFAM) report
- ODEQ 1200-C NPDES stormwater permit (if ≥ 1 acre of ground disturbance)
- ODFW Fish Passage Authorization
