

Walla Walla Basin Pesticide Stewardship Partnership

2026 PESTICIDE LABEL UPDATES FREQUENTLY ASKED QUESTIONS

Q	What changed on pesticide labels?
A	Some labels now include location- and month-specific directions in Bulletins Live! Two and additional spray-drift or runoff mitigation requirements.
Q	When should I check Bulletins Live! Two?
A	Check before each application when the label directs you there. Search by location, product, and application month, then save or print the bulletin.
Q	Where can I find more information?
A	The EPA Mitigation Menu explains qualifying spray-drift and runoff or erosion measures and their required specifications. ◦ https://www.epa.gov/pesticides/mitigation-menu
Q	What is the Walla Walla Basin PSP?
A	The Walla Walla Basin Pesticide Stewardship Partnership (PSP) is voluntary and non-regulatory. Local partners use water-quality monitoring and producer input to guide practical, on-farm fixes that keep pesticides on site while maintaining effective pest control.
Q	Where can I get free assistance?
A	Contact the Walla Walla Basin Watershed Council (WWBWC) to help you check whether your fields are in a Pesticide Use Limitation Area (PULA), answer questions, and connect you to resources.
